PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building and deploying production-grade web applications using React, Vite, Redux Toolkit, and Tailwind CSS. Delivered a zero-backend AI chat platform integrating Groq's Llama 3.3 LLM API with real-time inference, and a full-stack blogging platform on Appwrite Cloud with complete authentication and CRUD functionality. Achieved 99-100/100 Google Lighthouse Performance scores across production builds.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3

Frontend: React, Vite, Tailwind CSS, Redux Toolkit, React Router, React Hook Form

Backend & BaaS: Appwrite Cloud (Authentication, Database, Storage)

AI / LLM: Groq API (Llama 3.3), Prompt Engineering, Real-Time LLM Inference

Libraries & APIs: react-markdown, react-syntax-highlighter, TinyMCE

Tools & Deployment: Git, GitHub, Vercel, npm

PROJECTS

NexusAI — Production-Grade AI Chat Platform | [GitHub](#) | [Live Demo](#)

React, Vite, Tailwind CSS, Groq API (Llama 3.3), react-markdown, react-syntax-highlighter

- Architected and deployed a fully frontend, zero-backend AI chat platform powered by Groq's Llama 3.3 model for real-time LLM inference, eliminating the need for server infrastructure or a database.
- Achieved a 100/100 Google Lighthouse Performance score with a 0.6s Largest Contentful Paint (LCP) and 80ms Total Blocking Time (TBT) on the production build, verified via Google PageSpeed Insights (desktop).
- Engineered multi-session thread management (create, switch, rename, delete) with auto-generated titles and localStorage-based persistence, ensuring full chat history survives page refreshes.
- Implemented rich Markdown rendering with syntax-highlighted, one-click-copy code blocks (VSCode Dark+ theme via react-syntax-highlighter) for clean display of AI-generated code and formatted text.

Blogify — Full-Stack Blogging Platform | [GitHub](#) | [Live Demo](#)

React, Vite, Tailwind CSS, Appwrite Cloud, Redux Toolkit, React Hook Form, TinyMCE, React Router

- Built a full-stack blogging platform using React and Appwrite Cloud for authentication, database management, and file storage.
- Achieved a 99/100 Google Lighthouse Performance score with a 0.8s Largest Contentful Paint (LCP) and a 96/100 Best Practices rating on the production build, verified via Google PageSpeed Insights (desktop).
- Implemented complete post CRUD functionality with draft/published status, auto-generated slugs, and author-only edit and delete access.
- Managed global authentication state using Redux Toolkit with persistent sessions across page reloads.

CERTIFICATIONS & ACHIEVEMENTS

- Python for Machine Learning — Spoken Tutorial, EduPyramids, SINE IIT Bombay | Score: 96.00% | Credential ID: 85557832EJ
- Python for Automation — Spoken Tutorial, EduPyramids, SINE IIT Bombay | Score: 94.00% | Credential ID: 85557HV6KG
- ChaiCode Web Dev Cohort – Live 1.0 (160+ hour program), completed under Piyush Garg and Hitesh Choudhary | Certificate ID: 11186128-214298
- Maintained a consistent 8.30 CGPA throughout B.E. in Computer Science and Engineering

EDUCATION

B.E. in Computer Science and Engineering

SAL Institute of Technology & Engineering Research, Ahmedabad | CGPA: 8.30 / 10.0
